Disclaimer: Annual energy savings estimations are based on modelled energy savings and assumed retail energy rates. Actual savings will vary based on actual usage and retail rates and are indicative only. The 'Price discount' includes the VEECs discount and the program bonus. Where appliances are not decommissioned, savings figures are estimated based on the difference between a new appliance and Minimum Energy Performance Standards or market average data. The average installation prices are estimates only and may vary considerably depending on the equipment installed. Accredited Providers will be able to quote actual installation prices and overall price discount.

TOP SAVINGS TIPS:

- 1 Install timers on HVAC systems.
- 2 Set thermostats to 24C in summer and 20C in winter.
- 3 Upgrade to LED lighting.
- 4 Limit heat entry or heat loss: Look at draft proofing, insulating, shading, window tinting.
- 5 Review Tariffs and turn off appliance when not in use.
- 6 Consider Solar PV under the Solar Victoria, Solar for Business program: www.solar.vic.gov.au/solar-small-business
